

JMPS Program Overview

Mission Planning SEIC Industry Day

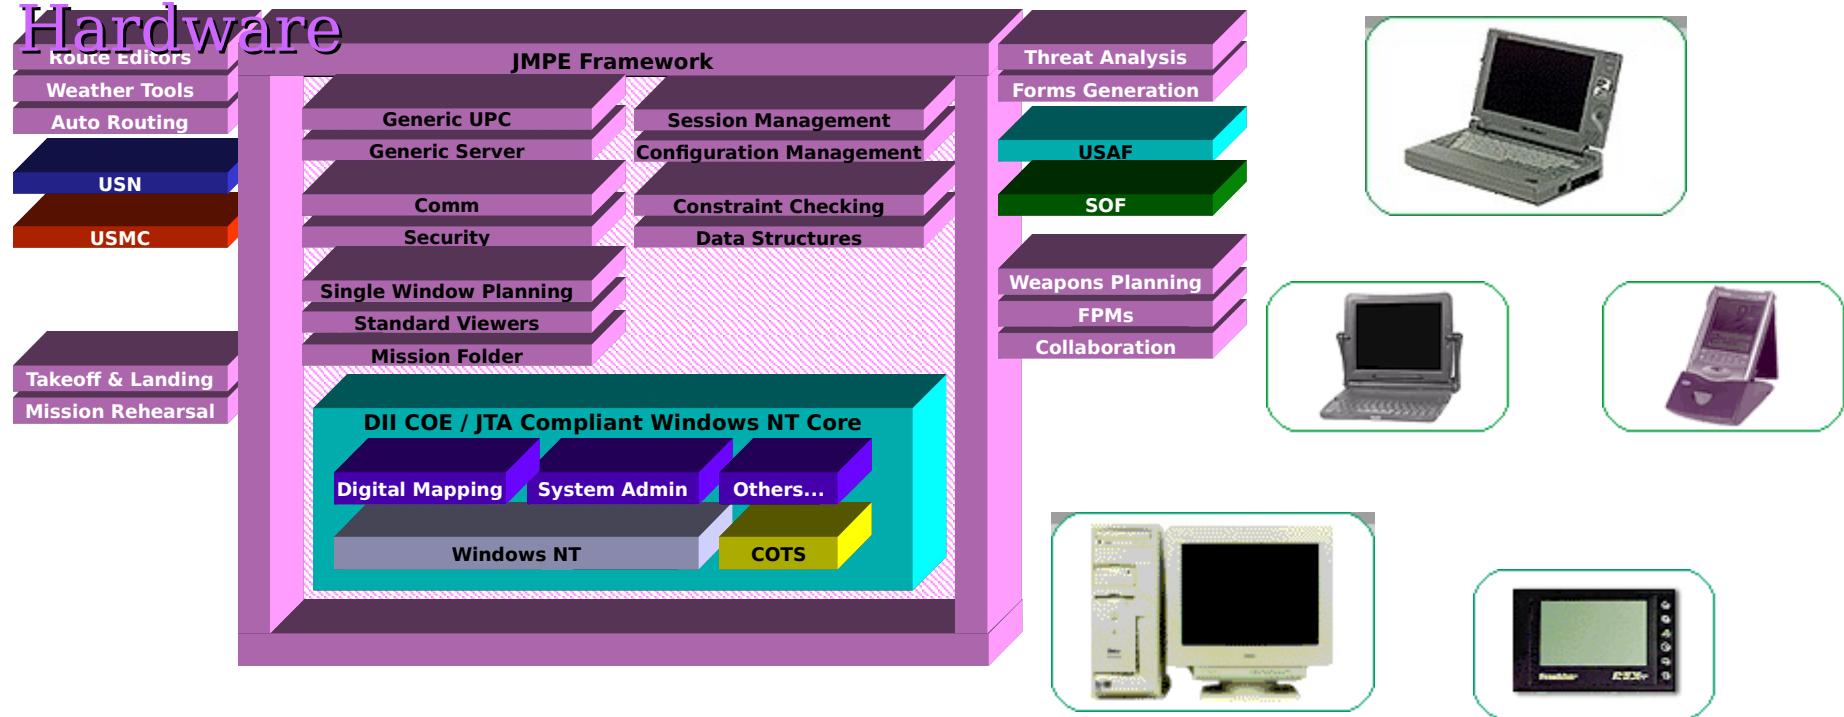

16 Dec 02

**CDR Ed Bellini,
USN**

Joint Mission Planning System Architecture

JMPE Framework + Service Unique Components + Hardware

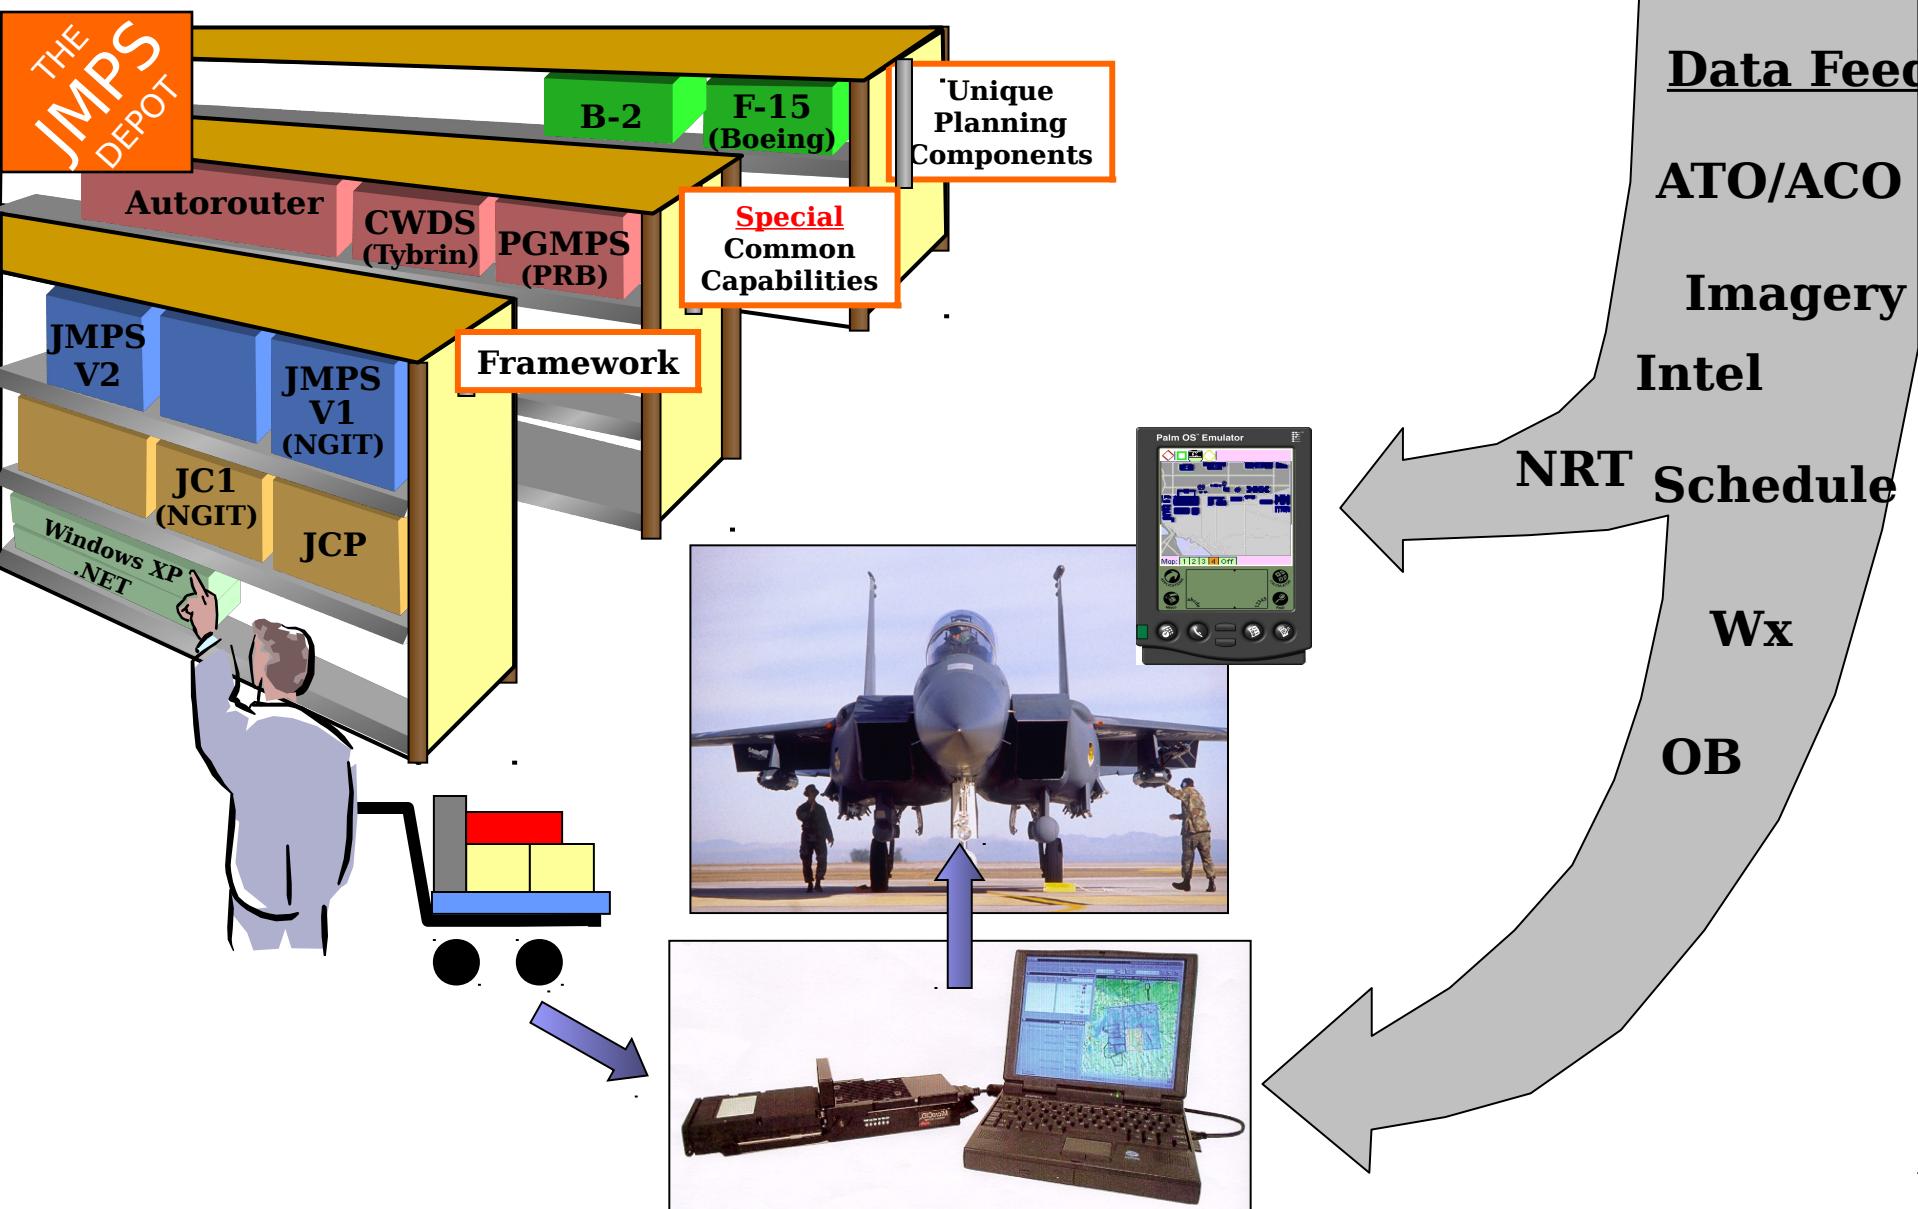

JMPS Builds Multi-User Common Components for Mission Planning on top of Common DII COE Services.

Platforms/Weapons “Add-On” their own UNIQUE Tools

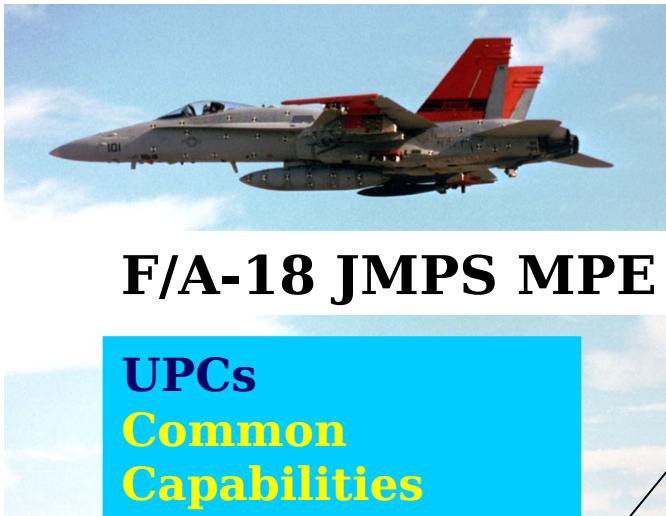

Joint Mission Planning Systems

JMPS Overview

Unique Planning Components	Fighter UPCs	Bomber UPCs	TASM UPCs	ISR UPCs		
JMPS Common Capabilities	PGMPS	CWDS	Mission Rehearsal	Sensor Predictions	Collaborative Planning	Refueling
Effectiveness Tools	Weapons Effectiveness Tool	Access Target Information	Weather Planning	Vertical Profile	Query Imagery	Customized MPE
	GATM	Airdrop	System Security	Web Browsing	Sensor Employment Planning	Political/Diplomatic Considerations
	Autorouting (JALC)	Strategic Planning	EW Planning			
JMPS Combat One	Crypto Key	JTIDS	Strike Planning Folder	GPS Predictions	Server Walkaway	
	Route Linking	Mission Binder	Water Pages	PTW Imagery Interface	Weather Data Feed	
JMPS Version 1	Basic Mission Planning	Route Editor	Archive Mission Data	Mission Tasking and Parsing Process	Basic Threat Analysis	
	Navigation Aid	Route Construction	Database Admin	Mission Data Load	Weather	
		Flight Planning	Generate Mission Materials	Terrain Planning		
		Time/Dist/Fuel				

JMPS Benefits

- **Interoperability/Collaboration** - Gulf & Kosovo CAOCs #1 Need
- **Reduced mission plan time** - Concurrent aircraft/weapon planning
 - System usable for Real Time Targeting, Mobile Target Planning
- **Improved Precision Engagement** - Integrates new smart weapons
- **EAF Mobility** - Reduced footprint - Reduced Training Time/Costs
- **Open Architecture** - Future capabilities integrated by developers
- **Reduced life cycle costs** - Single platform - Multi-service funding
- **COE** and **GATM** compliance
- ORDs Call for a **PC-Based** Planner

Force Level Planning

Strike Planning

Coordinated Aircraft & Weapon Planning

JMPS Contractual Timeline

JMPS Business Rules

- No restricted rights code - GPLR for code
- Licensing software not preferred
- Minimum SEI CMM Level 3 (or equivalent)
- Mission planning domain knowledge
- ACA with JMPS Integrator and Framework Maintainer
- Complete interface documentation (ICDs and IDDs)
- Periodic source and executable code release deliveries
- Programmer's Guide delivered
- Open design reviews (other JMPS developers may attend)
- Cost Performance (EVMS) data provided

These Rules Apply For All Future JMPS Developers

JMPS Technical Rules

- Design for extensibility
- DII COE Level 6 compliant
- Meet JMPS Security Target requirements
- Adhere to JMPS architectural standards
 - JMPS Object Model, COE USI Standards, Data Models, JMPS Interfaces
- Component design standards
 - Microsoft COM components
 - Interface Design Language (IDL) with semantics
 - Coding and Commenting standards
- Access to developer's problem database
- Comply with DoD directives
 - Use XML, Standardize Internet Protocol interfaces

These Rules Apply For All Future JMPS Developers

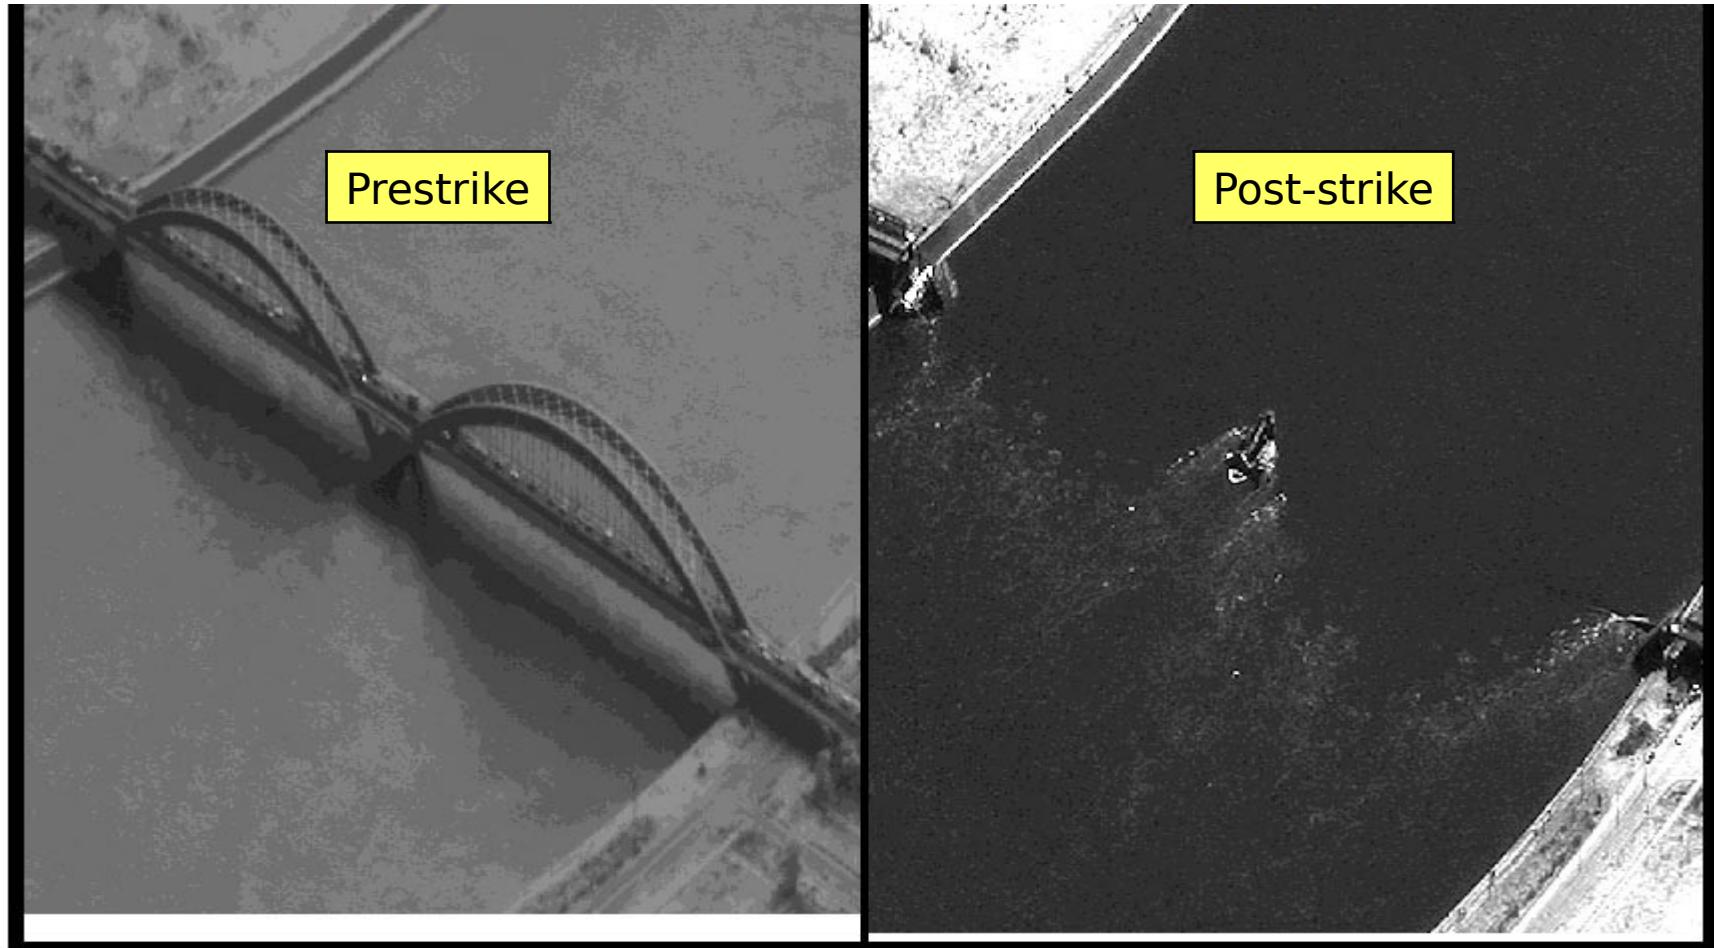

Summary

- JMPS Framework developed
- JMPS will be fielded:
 - Mar 04: Navy (F/A-18, F-14, E-2C)
 - Mar 05: Air Force (F-15)
 - 2005: Army, SOF
- Future JMPS developments in excess of \$1B
 - Framework Evolution
 - Common Capabilities
 - Platform UPCs

Thanks for your Interest in National Defense...
